

REPLACEMENT COOLER LAMPS

GAS STATION COOLER LAMPS

Bulbs Plus helped local gas station reduce cost on their coolers by switching fluorescent lamps with LED lamps. This reduced their electric consumption from 72 watts per fixture to 20 watts, therefore increasing the efficiency of the cooler. Bulbs Plus helped the customer take advantage of the utility rebate.

BEFORE INSTALLATION

FEATURES:

- Uniform light distribution and high CRI for attractive display
- Operate very efficiently at low temperature
- Produce less heat to reduce cooling cost
- More energy saving with dimmable control
- Eco-friendly with lower energy consumption
- 6 year comprehensive warranty

AFTER INSTALLATION
